

STEM AmeriCorps Program

(*Science Technology Engineering and Math*)

What is AmeriCorps?

AmeriCorps is a national service program similar to the Peace Corps, except it enlists citizens to do service here at home. AmeriCorps is regulated by the Corporation for National and Community Service, and there are currently more than 70,000 AmeriCorps members across the nation. AmeriCorps members dedicate their time to serve in many ways, making long-lasting change and positive community impact.

What is the STEM AmeriCorps program?

The STEM AmeriCorps program is sponsored by United Way of Saginaw County. The STEM goal is to enroll members to effectively collaborate with nonprofit agencies in Saginaw County, expanding and enhancing their STEM programs and focusing on an after school network of service sites.

What will I do as a member?

Members will provide direct service, facilitate STEM programs and mentor children and adolescents directly at an after school site throughout the year.

Why should I sign up?

Members receive an **INVALUABLE** experience and job training skills while networking with a wide range of human service agencies, possibly fulfilling requirements for college.

Members will serve quarter-time, **completing 450 hours** over the course of the program (averaging **18 hours a week**).

Members will qualify for a **\$2,700 living allowance** (paid monthly) and an education award of **\$1,527.78** (paid upon completion).

I'm ready to make an impact! What's next?

Please email your resume and/or any questions to: **Calvin Bagley, AmeriCorps Program Director** at cbagley@unitedwaysaginaw.org
